Model 8100 Precision Panel Feeder

This hydraulic panel feeder is designed to feed glue laminating lines, gang rip-saws, and more. The 8100 serves as an automatic lift, alignment fence, and holdover device in one machine ensuring that your parts are fed consistently every time!

With more than 20 years of proven field use this time tested, all in-one unit can be completely automatic and integrate with the host machine. Options are available for larger panels or to adapt an existing scissor lift.

Technical Specifications
